Rnd 6-7. 16 sc

Rnd 8. 16 sc + 3 sc to the edge of the head

Fix the thread, leave about 15 cm of yarn.

Let's make the antlers of the amigurumi reindeer pattern. You can do it more easily if you use copper wire or aluminum wire. After completing the shaping process, you

can make a black image of the horns using black thread or black tape.

Horns (2 pc)

We take a braided wire 18 cm long (if you use a different yarn, then you may need more / less) and bend it so that one half is longer. Form 2 branches from the long

part. Apply a drop of super glue to the tip of the horn and glue a dark brown yarn.

Gently wrap the wire along its entire length, periodically applying a drop of glue. At the end, cut the yarn, fix it with glue. Do the second horn in the same way. Connect both horns with an adhesive plaster, slightly cut the ends of the wire. Insert the

resulting structure into the head part, add a bit of toy stuffing and sew up the hole.

Let's crochet the ears of the amigurumi pattern
